

SANTA RECEIVES A RESPONSE...

"I have looked through your funding application with great interest Mr. Claus. The employment of minority groups is to be applauded. A transport system with virtually no CO₂ impact is fantastic. The general goodwill created as your outcome is brilliant.

Concerning your operations we have a few queries;
All your outputs occur on a single day which is strange.
Also have you undertaken a risk assessment about flying at night?
What are the H & S issues regarding entering premises through chimneys?
Do you obtain beneficiary permission to enter the premises?
Have you obtained CRB clearance?

Finally with regard to funding;
Where will your income come from?
How are you going to achieve long term financial sustainability?
How are you going to reduce grant dependency?
What is our exit strategy?
It is very commendable that you wish to become a social entrepreneur, but in this instance we suggest that you try an alternative career."
